DETAILED ACTION

Allowable Subject Matter

1. Claims 17-29 (renumbered 1-13) are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record, Okamoto et al (US 6,134,384) discloses a system having stored data stream on a hard disk drive for efficient, non sequential stored stream of the video (Figure 10) wherein the system has a transport packet that related in a ratio regarding byte number per packet to byte number for recording area (Column 6 Lines 34+). Additionally, Morinaga et al (US 6,792,000) teaches an apparatus that records transport streams to various recording mediums (Figure 1 and described in Column 4 Lines 38+). However, the prior art of record fails to disclose the following limitation:

A method of storing a video data stream on a hard disk drive (HDD) for efficient; non-sequential access to the stored stream of video data, the I-DD having a plurality of sectors, each sector having a first integer of user data bytes, the HDD addressable on sector boundaries, for non-sequential access, the video data stream including a sequence of original transport packets, each original transport packet having a second integer of bytes, the second integer of bytes different from the first integer of user data bytes, wherein a third integer of original transport packets are storable in a fourth integer of sectors, the fourth integer being a minimum number of sectors with the same number of user data bytes as the number of bytes in the third integer of original transport packets, the method comprising:

- receiving the sequence of original transport packets;
- adding a fifth integer of bytes to each original transport packet to create a sequence of modified transport packets, each modified transport packet having a sixth integer of bytes; and
- storing the sequence of modified transport packets on the HDD, wherein a seventh integer of modified transport packets are stored in an eighth integer of sector, the eighth integer being a minimum number of sectors with the same number of user data bytes as the number of bytes in the seventh integer of modified transport packets, the eighth integer of sectors smaller than the fourth integer of sectors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
